Acronis
Cyber Protect Cloud

Modernize your cybersecurity and backup with integrated cyber protection

PREVENT DOWNTIME AND DATA LOSS WITH ESSENTIAL CYBER PROTECTION

Acronis Cyber Protect Cloud is the only solution that natively integrates cybersecurity, data protection, and management to protect endpoints, systems, and data.

STRENGTHEN YOUR SECURITY SERVICES

▶ **Reduce risk**

Secure all workloads with next-generation cyber protection. Minimize your security risks with integrated cyber protection covering 100% of their endpoints and unlock unique capabilities not available from your current security vendor. Rise to the challenge of 2021's cyberthreats and greatly reduce security incidents and breaches. Leverage the solution that's a leader in independent testing (VB100, AV Test, AV-Comparatives, ICSA Labs).

▶ **Lower costs**

Cut cyber protection costs by up to 50%. Unlock cost savings by consolidating vendors instead of purchasing multiple point solutions from multiple vendors. Simplify management, improve workflow automation, and reduce the security risks caused by using a patchwork of tools. Harness the power of one with an integrated solution: one license, one agent, controlled and deployed through one intuitive console.

THE WORLD'S BEST BACKUP AND RECOVERY

Full-image and file-level backup and recovery safeguard workloads on more than 20 platforms – with near-zero RPOs and RTOs.

ENHANCED WITH ESSENTIAL CYBER PROTECTION AT NO ADDITIONAL COST

Advanced AI-based behavioral detection engine stops malware, ransomware, and zero-day attacks on endpoints and systems.

WITH PROTECTION MANAGEMENT BUILT FOR ALL VERTICALS

Enable thorough post-incident investigations and proper remediation, while keeping costs down by collecting digital evidence and storing it in a secure central repository.

ENHANCE YOUR BACKUP SERVICE WITH ESSENTIAL CYBER PROTECTION AT NO COST

**Gain a unique competitive advantage and increase your profitability with essential cyber protection
functionalities that cover all endpoints.**

▶ **Cybersecurity**

Stay ahead of modern cyberthreats with
award-winning anti-malware enhanced with
anti-ransomware capabilities focused on
zero-day threats. Prevent data leaks via local
channels.

▶ **Backup and recovery**

Minimize data loss across your infrastructureand
workloads with the best backup and recovery
technology, available in consumption-based or
per-workload licensing models.

▶ **Management**

Centralize your protection management and
provision endpoints in minutes. Remotely assist
and assess system vulnerabilities and security
gaps. Increase visibility with built-in monitoring
and reporting.

▶ **Disaster recovery (DR)**

Allow on DR-enabled tenants to establish secure
connection to the corporate network with their
personal devices, or test failover in an isolated
network environment.

EXPAND YOUR SERVICES WITH ADVANCED PROTECTION PACKS

Add other powerful components to strengthen your services even further with advanced protection packs and unique cyber protection capabilities. Control your costs by paying only for the functionalities your need. Advanced packs include:

▶ Advanced Security

Replace inefficient, legacy antivirus with integrated cyber protection that includes full-stack anti-malware. Increase your detection rate and responsiveness to the latest cyberthreats. Extend cyber protection to web browsing, backed-up data, the recovery process, and exploit prevention. Enable investigations by capturing forensic data in backups.

Full stack anti-malware
URL-filtering
Exploit prevention

▶ Advanced Backup

Strengthen your data protection services by ensuring never lose data, even between scheduled backups. Extend backup capabilities to SAP HANA, Oracle DB, and application clusters. You can also gain visibility for the protection status of all data across your infrastructure.

Continuous data protection
Data protection map
Scheduled backup reports

▶ Advanced Management

Streamline vulnerability management and promptly close gaps in your IT infrastructure through enhanced patch management. Gain visibility into your software assets and data protection to ease daily tracking and planning tasks, and improve uptime by monitoring disk drives health.

Patch management
Fail-safe patching
Disk drive health monitoring

▶ Advanced Disaster Recovery (DR)

Get back to business in mere minutes when disaster strikes by spinning up their systems in the Acronis Cloud and restoring them anywhere, ensuring immediate data availability. Make disaster recovery painless and increase efficiency with orchestration, runbooks, and automatic failover.

Production failover to the Acronis Cloud
Disaster recovery orchestration
Site-to-site VPN

▶ Advanced Email Security **Powered by Perception Point**

Block email threat, including spam, phishing attacks, business email compromise (BEC), advanced persistent threats (APTs), and zero-day threats in seconds before it reaches end-users. Leverage Perception Point's next-generation technology for lightning-fast detection and easy deployment, configuration, and management.

Anti-phishing and anti-spoofing engines
Anti-evasion technologies
Next-generation dynamic detection against zero-day threats
