

CYBER-WARFARE IS REAL..Are You Prepared? HUB TECH CYBER SECURITY SERIES:

Hackers could be banging down your door: Preventive Measures you can enact NOW

How likely is your company to fall victim to a cyberwarfare attack? What steps can you take to prepare and to prevent it? Intelligence finds that Russia has initiated cyberwarfare techniques against Ukraine as military engagement escalates.

Given the potential for similar attacks on US-based targets, HUB Tech recommends the following key preventative measures to enact now for the protection of your business:

- EDR – Endpoint Detect & Respond
- MDR – Managed Detect & Respond
- Secure Cloud Backup
- IT Risk & Vulnerability Assessments
- Advanced Email Security
- Cyber Security Awareness Training
- Secure Cloud Backup
- Business Continuity & Disaster Recovery Planning

In the coming weeks, we will be providing additional detailed information regarding the key preventative measures. **The protection of your business is our number one priority**, and we will update and advise you as circumstances necessitate.
