Ransomware Attacks Are On The Rise at School Districts Nationwide

Protect Your School District From Becoming the Next Victim

Watch or read the news today and Ransomware is everywhere. Cyber attacks targeting schools has risen significantly - up almost 20% - since the beginning of the Covid-19 pandemic, according to industry reports.

Cyber criminals have gotten more clever at stepping up Ransomware attacks, often launching attacks similar to the one that shut down the Colonial Pipeline earlier this month.

To stop the continuing increase in Ransomware, it is essential to ensure your district is trained in cyber awareness and the appropriate infrastructure security measures are in place. Signature based anti-virus and firewalls alone won't stop Ransomware, but we can help with **HUBcare's layered security strategy.**

Hoping you won't be attacked or aren't vulnerable is not a solution.**Don't make it easy for hackers to disrupt learning or take your district offline altogether.**

HUB Tech can assist you in**creating a security strategy** to help mitigate your risk posture. Our solution can be rolled out immediately to**Prevent, Detect, and Respond** to threats to your network.

Technology and HUB Tech Can Help You Get Through These Trying Times
